

When it comes to infection control, Karran's seamless sinks are the best choice.

Completed in 2015, the new Gibault Pavilion is a stunning new addition to the Good Samaritan Hospital in Vincennes, IN. Built at a cost of over \$100 million, the 5 floor, 200,000 square feet tower has 120 new beds, and over 350 new Karran sinks. Acrylic Sheffield, York, Del Mar and Edge E-315 sinks were chosen for their ability to be seamlessly integrated to all of the solid surface countertops used throughout the facility.

Project location: Gibault Memorial Tower
Good Samaritan Hospital
Vincennes, IN

Architect: BSA Life Structures - Indianapolis, IN
